Regarding Programming of Operating Frequency

"FCC 90.203 (e) Except as provided in paragraph (g) of this section, transmitters designed to operate above 25 MHz shall not be certificated for use under this part if the operator can program and transmit on frequencies, other than those programmed by the manufacturer, service or maintenance personnel, using the equipment's external operation controls."

This device has no provision for external frequency programming by the operator. Programming is done at the factory or by authorized service technicians.
